CAM BASTION DOLLAR FUND LTD (RETAIL INVESTOR HEDGE FUND)

INVESTMENT OBJECTIVE AND POLICY

CAM Bastion Dollar Fund Ltd is a feeder fund that invests solely into CAM Bastion Fund Ltd ("The Master Fund"). The Master Fund is a multi-asset class, multi-strategy, global hedge fund that aims to achieve long-term capital growth through generating consistent, uncorrelated returns. To achieve this, the Investment Managers seek to identify undervalued securities that offer strong upside potential over the medium to longer term.

The Master Fund typically invests in a wide range of assets, with a preference for shares and fixed income instruments. The Investment Managers strive to reduce risk through disciplined hedging practices and by maintaining high levels of liquidity to minimise correlation to the equity market. The Master Fund may use overall leverage up to a maximum of two times its total assets without double counting and may use short positions or engage in derivative transactions.

INVESTMENT MANAGER'S COMMENT

Markets remained under pressure during September, with most indices ending the month near their intra-month lows, as the prospects of a sustained period of higher interest rates sank in. The MSCI World Index fell 4.3% (in US dollars) and global government bond yields rose, especially on longer-dated maturities, causing a sharp sell-off in bond markets. Conversely, equity markets slid as valuations adjusted to the higher-for-longer interest rate environment. Economic data in the US remained strong, causing speculation that the US Federal Reserve would not pause its interest rate hikes during its November or December meetings. Early signs of inflation slowing in the Eurozone weren't enough to offset concerns around the impact of higher rates on the underlying economy. Chinese markets remained weak as concerns regarding the real estate sector and the general health of the Chinese economy and consumer persisted. The CAM Bastion Dollar Fund ("the fund") fell 1.6% in the month. Positive contributors included the fund's index short positions and insurance sector exposure while the negative contributors included the fund's retail and bond exposures. Markets remain highly volatile with near term risks escalating and given this backdrop the fund's positioning remains on the conservative side of the spectrum.

LEGAL STRUCTURE OF THE FUND

The Funds are feeder Funds into CAM Bastion Fund Ltd ('the master Fund') and invest solely, apart from currency hedging intended to protect the base currency value, into US Dollar denominated Participating Shares of the master Fund which will not otherwise be available to subscribers. The CAM Bastion Dollar Fund Ltd was originally incorporated as CAM Bastion Fund Ltd in the British Virgin Islands on 9 October 2000, was continued in Bermuda on 1 December 2003 and was continued in Guernsey as CAM Bastion Dollar Fund on 31 December 2018 as a non-cellular company limited by shares. The Master Fund was incorporated in Bermuda on 8 June 2004 and continued in Guernsey on 31 December 2018 as a non-cellular company limited by shares.

RISK WARNING

The risk and return profile of a Fund illustrates the amount of risk undertaken by an investor in the hope of achieving a particular return on an investment. The generally accepted principle is that potential return rises with an increase in risk. In addition to the risk warnings included elsewhere in this document, it is important to note that there are many other risks associated with investing in collective investments. These can include but are not limited to the following: general market risks (such as general movements in interest rates; external factors [war, natural disasters and such like]; changes to the law and regulatory frameworks; governmental policy changes; global, regional or national economic developments), risks related to a specific security (like the possibility of a company's credit rating being downgraded); and loss in the purchasing power of an investment as a result of an increase in the price of consumer goods (known as inflationary risks).

The Fund may invest in foreign securities. There are potential material risks associated with investing in foreign securities. These include but are not limited to: potential constraints on liquidity and the repatriation of Funds, macroeconomic risks, political and social instability, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information, all of which may have an impact on Fund performance. In addition, risks associated with investing in emerging markets (which are generally less mature than those in developed markets) include but are not limited to currency risks, the possibility of expropriation, confiscatory taxation or nationalisation of assets and the establishment of foreign exchange controls which may include the suspension of the ability to transfer currency from a given country.

Hedge Funds use complex hedging strategies that include the use of leverage and short selling strategies to increase the exposure of the Fund beyond the capital that is employed to an investment. Leveraging includes the use of derivatives. Derivatives derive their value from the value of an underlying asset. The use of leveraging within a Fund involves risk because depending on how the leveraging is structured, the Fund's losses or gains may be unlimited. Other risks include counterparty risk and liquidity risk. Counterparty risk is the risk that the other party to a transaction may not be able to perform their obligations. Liquidity risk means that during volatile periods, the tradability of certain instruments may be impeded. The Master Fund may use overall leverage up to a maximum of 2.5 times the Fund's total assets without double counting. In addition, the Rand Funds may use leverage, but for currency hedging purposes only.

Total Expense Ratio (TER) and Transaction Costs (TC)

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. The TER does not include Transaction Costs, which are shown separately. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the Investment Manager and the TER.

GENERAL DISCLOSURES

This document is the minimum disclosure document required by Board Notice 92 of 2014 published by the Financial Sector Conduct Authority under the Collective Investment Schemes Control Act 45 of 2002. Collective investment schemes are generally medium to long-term investments but a hedge Fund may have short-term strategies and practices. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance and may not be repeated. Collective investment schemes are traded at ruling prices (which may fluctuate post publication) and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the Fund or Peregrine. Neither the Fund nor Peregrine provides any guarantee either with respect to the capital or the return of the Fund. Where any forecasts or commentary about the expected future performance of asset classes or the market in general are made in this document, please note that neither the Fund nor Peregrine guarantee that such forecasts or commentary will occur. The Fund endeavours to pay redemption proceeds within 7 days of the redemption date.

DISCLOSURES IN RESPECT OF FEEDER FUNDS

This Fund is a feeder Fund. A feeder Fund is a Fund that invests in a single portfolio of a collective investment scheme, which levies its own charges, which could result in a higher fee structure for the feeder Fund. The manager has a right to close the Feeder Fund to new investors in order to manage it more efficiently in accordance with its mandate if it determines, in its sole discretion, that the acceptance of further subscriptions is not in the interests of existing Shareholders.

CAM BASTION DOLLAR FUND LTD (RETAIL INVESTOR HEDGE FUND)**PERFORMANCE DISCLOSURES**

The performance calculated and shown is that of the Fund. Individual investor performances may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment and dividend withholding tax. Where periods of longer than one year are used in calculating past performance, certain figures may be annualised. Annualisation is the conversion of a rate of any length of time into a rate that is reflected on an annual basis. Actual annual figures and performance calculations are available to an investor on request. NAV to NAV figures have been used for the performance calculations, over all reporting periods. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the Fund, irrespective of the actual reinvestment date.

CALCULATION OF THE NAV AND PRICE

The value of participatory interests is calculated on a NAV basis. The NAV is the total value of all assets in the Fund including any income accruals and less any deductible expenses (which may include audit fees, brokerage, service fees, and securities transfer tax and bank charges). The price of participatory interests is calculated by dividing the NAV by the number of participatory interests in issue. The Fund is available via certain LISPs, who levy their own fees. Investors in this Fund may thus be liable for an initial fee and/or annual service fee levied by the third party administrator that is not reflected in the initial charge (where applicable) or NAV calculation. Prices are published monthly on www.peregrine.gg. The official notice period for redemptions from this Fund is 5 business days.

LIMITATION OF LIABILITY

This document has been compiled for information purposes only and does not take into account the needs or circumstances of any person or constitute advice of any kind. It is not an offer to sell or an invitation to invest. The information and opinions in this document have been recorded by the Fund and Peregrine in good faith from sources believed to be reliable, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. The Fund and Peregrine accordingly accept no liability whatsoever for any direct, indirect or consequential loss arising from the use of this document or its contents.

COMPLAINTS PROCESS

Any complaint must be set out in writing and sent to the manager's physical address, No. 1 Upper Ground Floor, Royal Terrace, Royal Avenue, St Peter Port, Guernsey GY1 2HL, and include all relevant information and documents in the complainant's possession. The complaint must be addressed to Peregrine's compliance officer and posted or hand-delivered to Peregrine's physical address above or sent by email to info@peregrine.gg. The complaint will be investigated internally and the complainant will be advised of the outcome of the complaint.
